Footnotes:

1. Not required for students age 5 and older.
2. A minimum interval of 28 days can be applied if the vaccine has already been administered
3. Verification of varicella disease: must be confirmed in writing by a MD, PA, or APRN
4. DTaP is not administered to children age 7 or older; Tdap may be administered to children 7 and older unless contraindicated
5. Hepatitis A requirement indicated for students born 1/1/07 or later

Additional Series Information:

- All documented doses should meet the age and interval criteria in the [Child and Adolescent Immunization Schedule](#) recommended by the Advisory Committee for Immunization Practices (ACIP) and Published by the Centers for Disease Control and Prevention (CDC) - <https://www.cdc.gov/vaccines/hcp/imz-schedules/child-adolescent-age.html>
- Laboratory confirmation of immunity (a positive titer) is only acceptable for hepatitis A, hepatitis B, measles, mumps, rubella, and varicella
- Two live vaccines that are not administered the same day must be separated by a minimum of 28 days. If they are not separated by at least 28 days, the second dose is not valid.
- New entrants are any students who are new to the school district, including: all preschoolers, all students coming in from Connecticut private, parochial and charter schools located in the same or another community, all students entering kindergarten including those repeating kindergarten, and those moving from any public or private preschool program, even in the same school district. The one exception is students returning from private approved special education placements—they are not considered new entrants.
